

COMPACT SERIES D3138KW Walk-In Tub

The American Tubs **D3138KW** from our Compact Series, with its uniquely compact design, affectionately called the "Cube Tub", can be installed where other traditional walk-in tubs cannot. The D3138KW's versatility makes it a perfect solution as a free-standing tub or for a three-quarter bath with an existing 36"x36" shower stall. This compact model comes equipped with 2 integrated side panels and an outward-swinging door which allows for a variety of creative installations, such as in laundry areas, washrooms, and garages. Unlike our other larger tub models, the D3138KW comes standard with a Kingston one-piece faucet set and attached a handheld sprayer that mounts on its compact tub deck.

The adjustable shower slide bar and custom-tailored shower curtain are the most common accessories paired with the D3138KW to maintain the showering function of the space. When installing the D3138KW in a 3-wall alcove, it is important to install an additional maintenance hatch(es) for easy future access to system components.
